

A1/B2 Asset Condition Refurbishment Project

Project Information Update

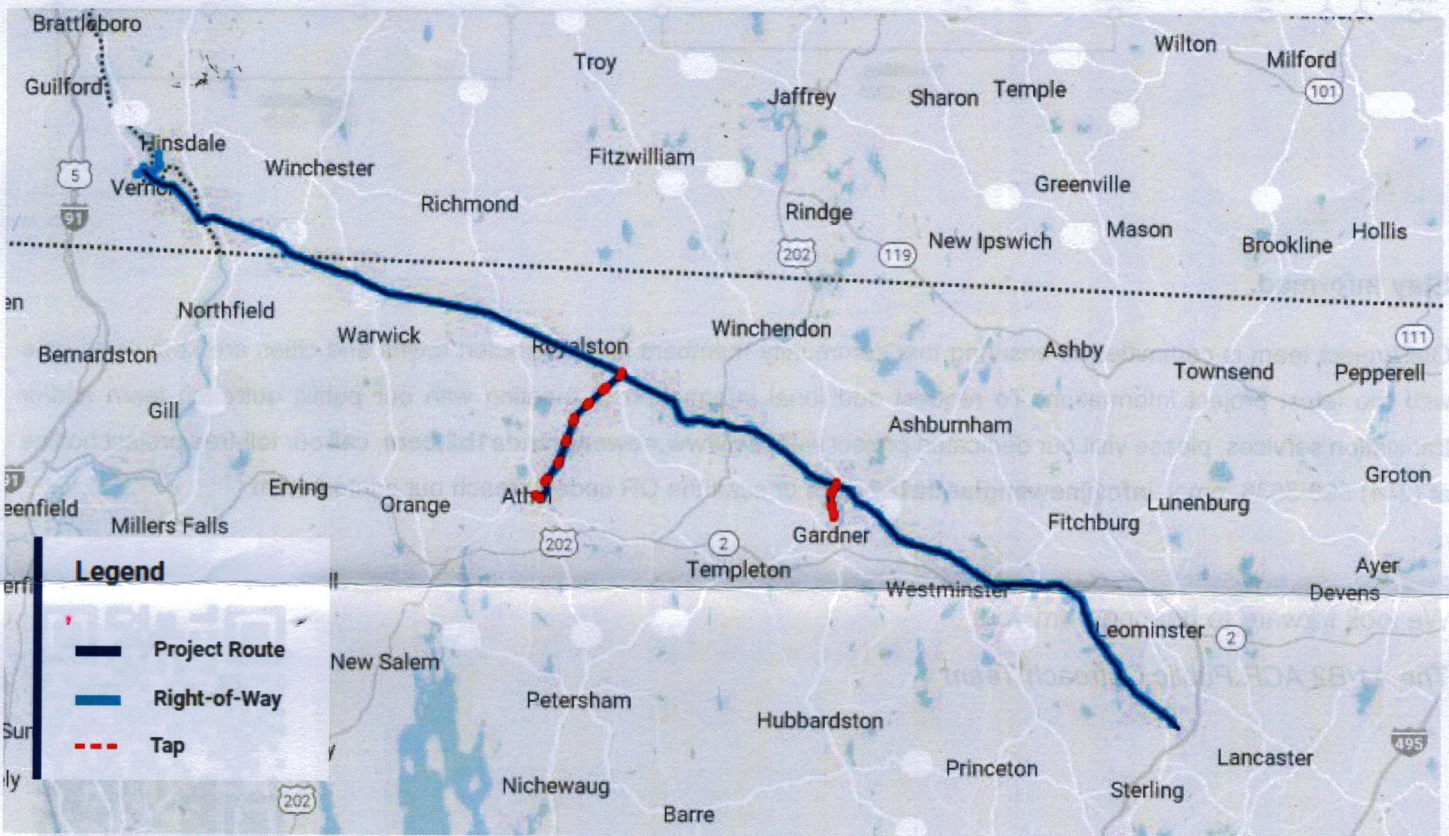

December 2024

Dear Neighbor,

We are reaching out to provide another update on the status of the A1/B2 Asset Condition Refurbishment (ACR) project. The project is located on the existing National Grid right-of-way (ROW), spanning approximately 61 miles. The scope to rebuild these lines includes structure replacements, structure foundations, new conductor, and right-of-way access improvements where necessary.

Location

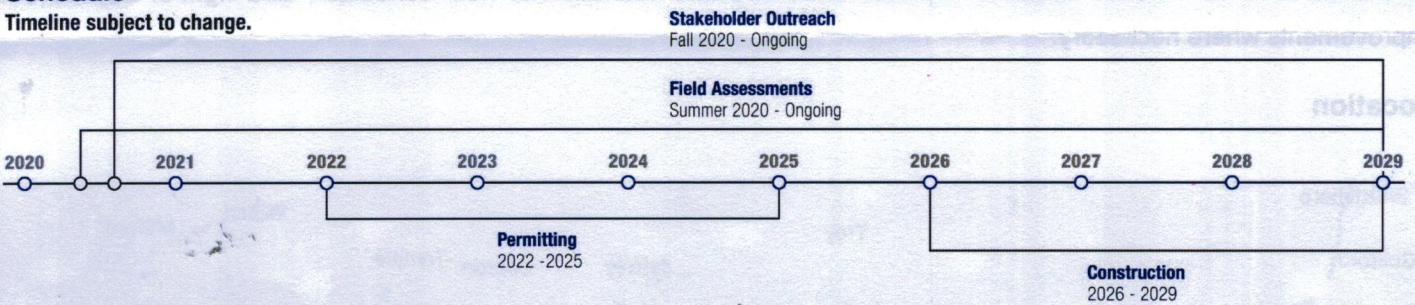

Upcoming Activities

The project team is continuing various needed field assessments and surveys including wetland flagging. The team is working down the ROW and access roads. Construction is currently taking place in New Hampshire and Vermont. Per our last update, construction in Massachusetts is anticipated to begin in fall 2025 pending our permitting outcome with the Energy Facilities Siting Board (EFSB). Line work in Massachusetts is anticipated to begin in 2026. This schedule is subject to change, please see the Massachusetts work schedule below.

We have sent two rounds of the **Wood Program** flyer to residents who have forestry work planned on their property. If you have received this flyer and would like to keep the cut wood on your property, please contact us. If you have not received a flyer but are interested, please feel free to contact us and we will inform you if your property applies.

Schedule

Timeline subject to change.

Stay Informed

Our project team is committed to ensuring that community members in all impacted towns and cities are kept up to date with the latest project information. To request additional information, a meeting with our public outreach team and/or translation services, please visit our dedicated project website www.newenglanda1b2.com, call our toll-free project hotline at (844) 500-3536, email info@newenglanda1b2.com or scan the QR code to reach our contact form.

We look forward to hearing from you!

The A1/B2 ACR Public Outreach Team
